8

Caterpillars

Marc Lame, Indiana University

9

Bees and Wasps

Marc Lame, Indiana University

10

Honey Bees

- A sting from an Africanized bee is no more venomous than that of a domestic European honey bee. But a larger % of the hive population is defensive. Thus multiple stinging is the problem.
- Remember AHB can be distinguished from EHB only by measurements under a microscope, or by analysis of their DNA.
- DO NOT FLAP!

11

Pantry Pests

Marc Lame, Indiana University

12

Dermestids – Carpet/Hide Beetles

Marc Lame, Indiana University

13

Silverfish & Firebrats

Marc Lame, Indiana University

14

Fleas

Marc Lame, Indiana University

15

Ticks

Marc Lame, Indiana University

16

Ticks

Larvae have 6 legs

Marc Lame, Indiana University

17

Dog tick

**14-POUND
TICK FROM
WOMAN'S
BACK!**

Bug imbedded itself into
her flesh in 1987 — and
grew & grew & GREW!

Marc Lame, Indiana University

18

Lice

Marc Lame, Indiana University

19

Bed bugs

Marc Lame, Indiana University

20

Filth Flies

Marc Lame, Indiana University

21

Blow-fly, House-fly, Flesh-fly

Marc Lame, Indiana University

22

Mosquitoes

Marc Lame, Indiana University

23

Spiders

Marc Lame, Indiana University

24

Bark Scorpion *Centruroides exilicauda*

Marc Lame, Indiana University

25

Beetles
