

RE: WVDEP UIC Program (Class V Injection wells) applications

Determination of need for application submission to WVDEP

❖ Types of facilities that require submittal for review by the Groundwater Division:

1. The facility's waste is solely sanitary waste that discharges to the subsurface and will serve 20 or more people in a day, or,
2. The facility's wastewater daily design flow will exceed 3000gpd and is proposed for subsurface discharge.
3. If the subsurface discharge waste stream consists of co-mingled waste, regardless of number of people using the facility. (Co-mingled waste is sanitary waste plus industrial waste, or process water. A home-based business could qualify) or,
4. The facility is an RV campground, or Beauty Shop, regardless of number of people to be served.

If an application for permit for a subsurface discharge is received for an operation that falls into any of the above-listed categories please mail or fax a copy of the application, along with the information below, to the DEP to allow them to assess the situation to determine if a UIC permit will be needed.

Health Department: _____ Sanitarian: _____

Phone Number: _____ Fax: _____

Sanitarians Email Address: _____ Date: _____

Contact Information for Facility

Owner/Operator/ Contact Person: _____

Phone: _____ Email: _____

Mailing Address: _____

Physical Address where septic system will be installed: _____

Type of facility utilizing the septic system: _____

Number of people using this facility (employees, church members, etc.): _____

Will the facility have restrooms open to the public? _____

Attach copy of application for onsite sewage permit and mail, email or fax to: Connie Anderson
